Star Micronics Co., Ltd. (“the Company”, Head Office: Suruga-ku, Shizuoka City, Shizuoka Prefecture; Representative Director, President and Chief Executive Officer: Mamoru Sato) announces that Star Micronics GB Ltd. (hereinafter “SMGB”), its UK sales subsidiary for machine tools, has relocated its office and held an opening ceremony on August 5.

SMGB was established in Derbyshire, UK, in February 1992. After relocating within the same state in 2016, it has continued to handle the sale of machine tools and the provision of related services in the UK and Ireland. At the new office, in addition to machine tool displays and machining demonstrations, SMGB will continue and expand a wide range of support services—from pre-sales services such as test machining and machine operation training to after-sales services including maintenance—in order to further increase its share in the region.

In cooperation with the European Solution Center in Zurich, Switzerland, which began operations last December, we will strive to provide comprehensive services in Europe as a leading manufacturer of automatic lathes.

■ Overview of SMGB

Address: Unit 2, Paradigm Way, Derby, DE24 9ST, U.K.
