## Machine Tools

- Sales in the U.S. increased on the back of effect of the strong yen. Against this backdrop, trends mainly in the mainstay medical equipment-related sector were steady over the latter half of the fiscal year.
- Sales in Europe declined substantially in the period under review. This was largely due to the effect of the strong yen and sluggish sales in such emerging markets as Eastern Europe as well as in major countries including Germany.
- Sales in the Asian market declined. Despite steady trends in China, this decline was mainly due to the downturn in sales in other regions and the effect of the strong yen.
- Sales in Japan declined. This largely reflected the cautious approach adopted by the market toward capital expenditures.

## Precision Products

Sales

## Sales of Non-wristwatch Components

- Sales of wristwatch components declined. This was mainly due to the impact of production adjustments by wristwatch manufacturers.
- Sales of non-wristwatch components also declined. This largely reflected the downturn in automotive components and others as well as the effect of the strong yen.
