## About the Change in Account Settlement Date

Star Micronics changed the account settlement date of its previous fiscal period (ended December 31, 2018) from the end of February to December 31. Effective from the fiscal year under review, the fiscal year for the Company and all of its consolidated subsidiaries began on January 1 and ends on December 31. Meanwhile, details of any profit and loss increase or decrease compared with the corresponding period of the previous fiscal year have been omitted because of the transitional nature and irregular period of the previous fiscal period.

## Quarterly Information(Net Sales)

[^0]
## Special Products

stars

- Sales were weak in the U.S. market. This largely reflected the impact of inventory adjustments by sales agents.
- Sales were sluggish in Europe due mainly to the slowdown in market conditions.
- Sales were weak in the Asia market due to demand for dot-matrix printers slumped in China.
- Sales were firm in Japan market. This was primarily due to market activity in the leadup to the consumption tax rate hike.
※Figures presented as the FY12/2018(Ref.) have been calculated to facilitate a comparison with the FY12/2019 under the same conditions.

## Machine Tools

stala

- Sales were sluggish. In addition to firm demand in the U.S. market centered on the medical equipment-related sector and signs of a cautious approach adopted toward capital expenditures in Europe, this sluggish trend in sales largely reflected corrections to the sales brought forward as of the end of the previous fiscal year and insufficient supply of top selling models.
- In the Asian market, sales were robust in the medical- and telecommunications-related markets in China.
- While there were indications that a portion of demand had stalled in Japan, sales were firm focusing mainly on the domestic automobile-related market.

[^1]
## Precision Products

Sales

Sales of Non-wristwatch Components

- Sales in the Precision Products Segment were weak. This was mainly due to the impact of inventory adjustments by wristwatch makers on the Group's wristwatch component operations as well as the effects of the drop in demand in China and reorganization of overseas production bases on non-wristwatch activities.
※Figures presented as the FY12/2018(Ref.) have been calculated to facilitate a comparison with the FY12/2019 under the same conditions.
