# TSP100/TSP650 Mounting the Splash-proof Cover
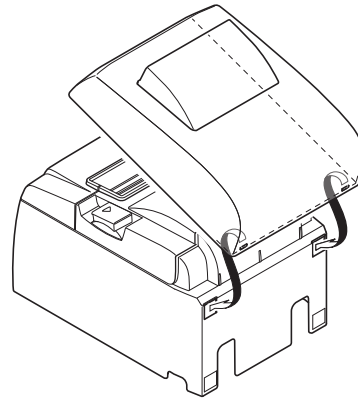

1. Unpacking: Check that all of the accessories are included.

Splash-proof Cover

2. Mounting Procedures:

2-1 Mounting the Splash-proof Cover

① **Hang the claws on the inside-backside of the splash-proof cover in the grooves on the backside of the printer.**
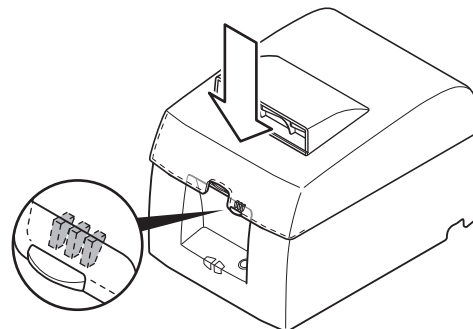

② **Press the front side of the splash-proof cover to attach it.**

   Note : Firmly press the claws on the inside of the front surface of the splash-proof cover until they are in the openings of the printer operation panel to ensure the fit.

< TSP100 >   < TSP650 >

③ **Lightly lift the leading edge of the splash-proof cover and check that there is no looseness in the splash-proof cover. If that can be confirmed, the mounting is complete.**

   Note : • Do not attempt to lift the printer by the splash-proof cover.
   If you do, the cover can come lose, causing the printer to fall. That will damage the printer.

   • The splash-proof cover does not fit when used on a vertical layout type.

   • The splash-proof cover does not completely prevent moisture from getting inside the machine.
   If moisture gets inside, turn the power off and unplug the power plug from the AC outlet.
